

IMPORTANT SAFEGUARDS READ AND FOLLOW ALL SAFETY INSTRUCTIONS.

When using electrical equipment, basic safety precautions should always be followed including the following:

- **DISCONNECT AC POWER SUPPLY BEFORE SERVICING.**
- Installation and servicing of this equipment should be performed by qualified service personnel only.
- Ensure that the electrical wiring conforms to the National Electrical Code NEC® and local regulations if applicable.
- Not suitable for use in wet locations.
- Do not mount near gas or electrical heaters.
- Equipment should be mounted in locations and at heights where it will not be readily subjected to tampering by unauthorized personnel.
- The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- Any modification or use of non-original components will void the warranty and product liability.
- Do not use this equipment for other than intended use.

Installation

1. Mount the Emergency Battery Backup to the fixture.
2. Fix the light and emergency kit on the ceiling or wall with screws. (Fig.1)
3. Disassemble the fixture lens and reflector. (Fig.1)
4. All electrical connections should be made inside the junction box. Make electrical connections as follows (Fig.2):

120-277VAC

- ¹Black - Switched/Unswitched
- ²Black - Unswitched
- White - Common
- Green/Yellow Green - Ground

5. Assemble the lens and reflector back to the fixture body. (Fig. 3)

Dimension Drawing
