REMOTE MONITORING & REPORTING

# SMARTER. FASTER. SAFER.

The era of IoT (internet of things) has brought about significant transformations in the world of technology, ushering in a wave of innovation and change. Your ongoing drive for smarter, more efficient, and secure buildings has opened up an array of possibilities.

**Exitronix** intelligent emergency lighting solutions are designed to be completely controlled from your tablet, enabling you to access the **Guardian G3** with a high level of cybersecurity for enhanced safety and reliability. This cutting-edge technology facilitates better maintenance planning and reduces your operating costs, making it an ideal solution for any building.

# 3 CUSTOMER SATISFACTION

## 50 YEARS & COUNTING

Founded in 1973 as an electronics manufacturer, **Barron Lighting Group** has enjoyed five decades of growth built on its core values of integrity and innovation. In 1984 a local theme park came to Barron to develop a maintenance-free emergency exit sign. The park was huge and had a lot of emergency exit signs, some of them in dangerous locations, such as the top of the tallest wooden roller coaster in the world! Bulbs were having to be replaced on a weekly basis, costing the owner thousands of dollars in maintenance fees a month. This customer need led to the first LED exit sign and the trusted brand, **Exitronix**. 2-years later **Exitronix** was the first LED lighting company to offer an unprecedented 25-year warranty. Today you will find Exitronix emergency lighting throughout buildings across the USA.

**Guardian G3** is the next evolution in emergency lighting. Giving you the ability to automate testing and monitoring of your emergency lighting and pull reporting via the application on your tablet.

# KEEP YOUR MONEY

## IN YOUR POCKET

4

### SAVE OVER \$100 PER UNIT PER YEAR

- You will **save on operational and maintenance costs**, eliminating the need for manual collection and recording of data
- **Test, monitor, and pull reporting** via software on tablet within the building, completely eliminating the disruption of your operations
- **Combat personnel risk** by mitigating unnecessary ladder climbing
- Benefit from having advanced awareness of failure statuses, enabling fixtures to be repaired immediately, enabling you to **be prepared for inspection**
- Utilizing the Zigbee mesh network you can put **up to 100 emergency lighting units on one gateway**

“

**The Fire Marshal is relentless.** It is almost an impossible task for my customer. With over 200 buildings, they had eight people doing monthly and annual testing of the fixtures. It was their full-time job.

**Rob Pieroth**  
Positive Energy

”

GUARDIANG3

# 5 WHEN DISASTER STRIKES **COUNT ON GUARDIAN G3**

*A recent National Climate Assessment warned that:*

Extreme weather events are expected to increasingly disrupt our Nation's energy and transportation systems, threatening **more frequent and longer-lasting power outages.**

The **Guardian G3** solution is specifically designed to mitigate your business risk, and enable code compliance with your buildings legal requirements and standards.

Ensuring the safety of public facilities is of utmost importance, and compliance with codes and regulations plays a vital role in guaranteeing the functionality of emergency lighting. The National Fire Protection Association (NFPA) and International Code Council (ICC) release codes that govern public health and safety. By adhering to these standards, public facilities can ensure that their emergency lighting systems are always functioning optimally and prepared for any emergency situation.

# UNLOCK ULTIMATE NETWORK PROTECTION

6

WITH GUARDIAN G3

## HOST LOCALLY & KEEP HACKERS AT BAY

By hosting **Guardian G3** locally, you can bypass your IT department. The **G3** data is securely stored on your gateway, **providing utmost network protection** against potential hackers.

# 9 INSTALLATION IS A BREEZE

WITH GUARDIAN G3

---

Get a head start with **Guardian G3** software already preloaded on your tablet, personalized with your fixtures and floor plan. Barron took care of the tricky part!

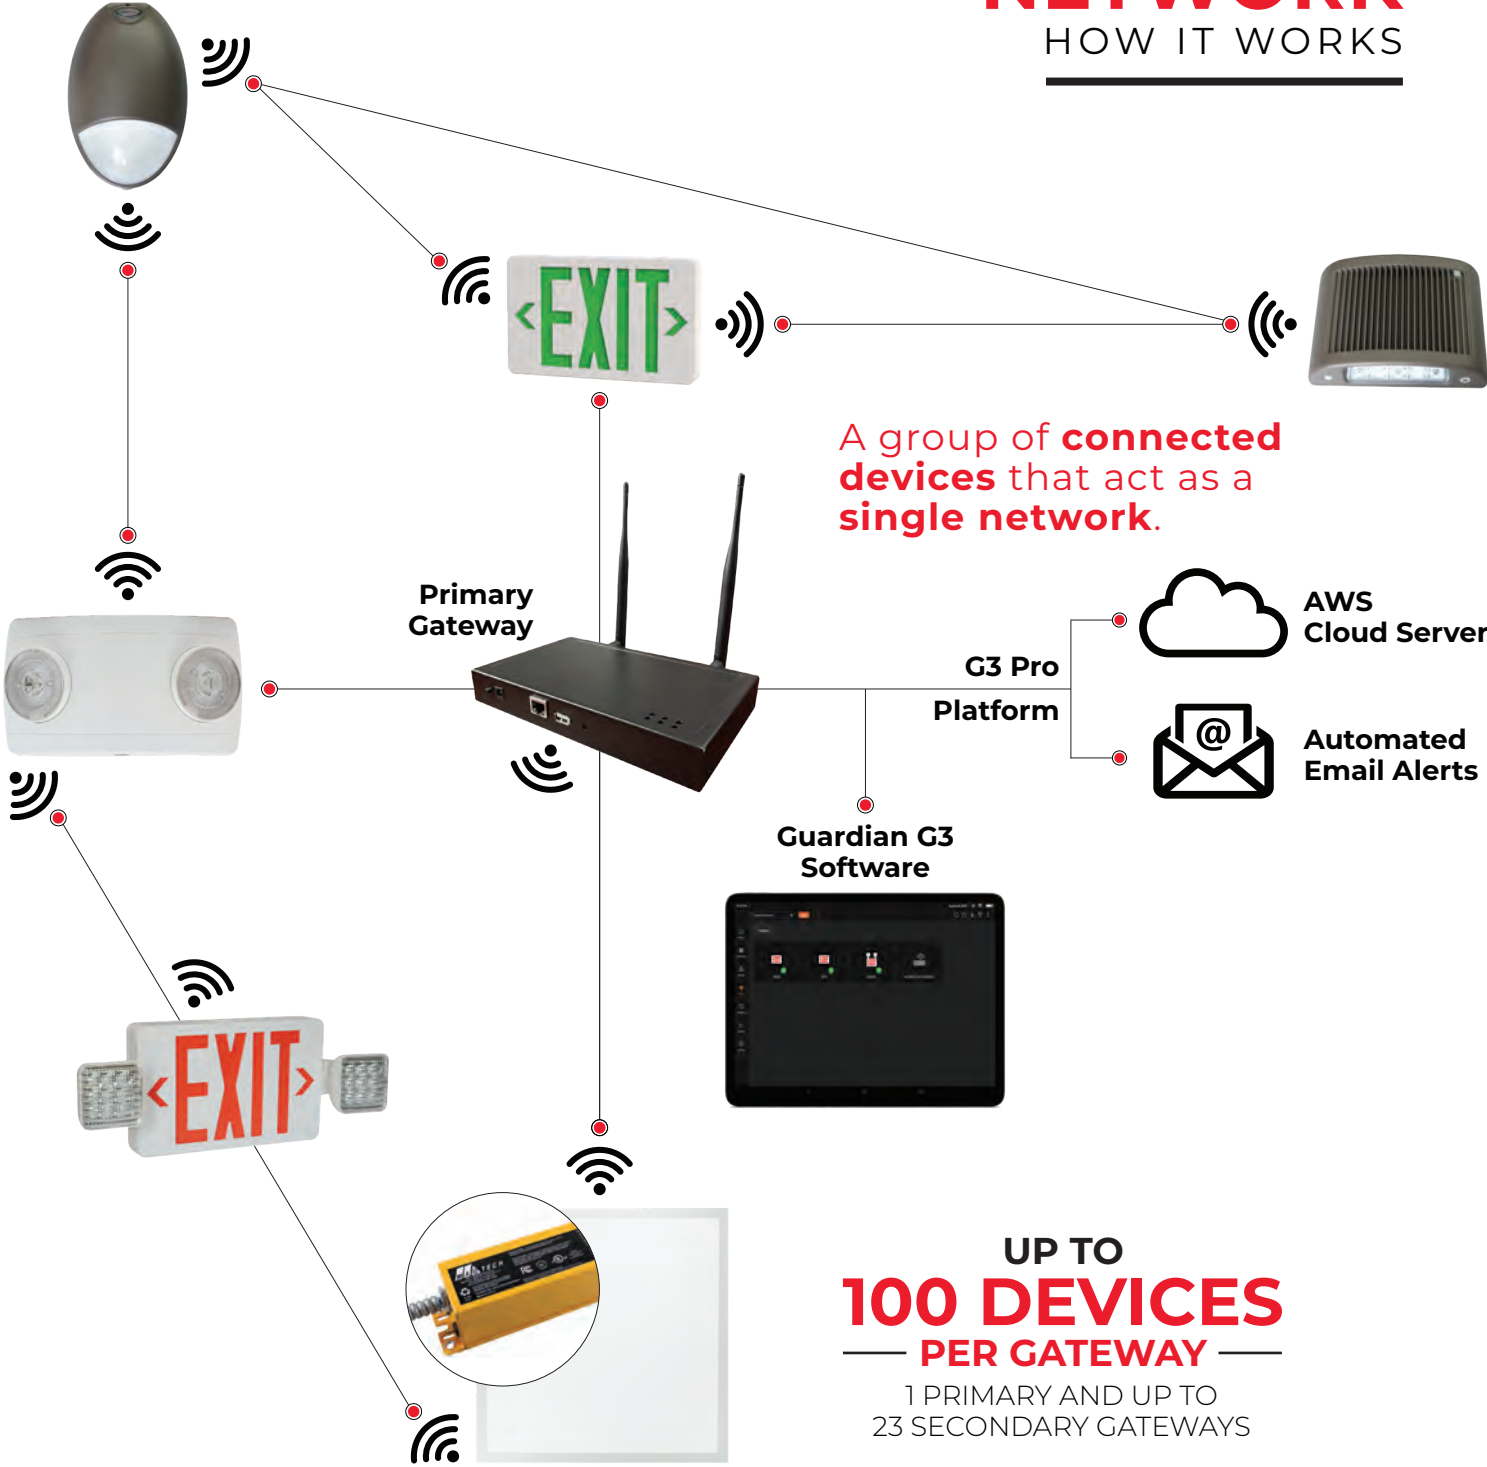

**Guardian G3** equipped fixtures automatically perform the NFPA 101 required tests of your emergency lighting, providing you with immediate results and **eliminating the need for visual verification** or disruption of the power supply.

## BUILD A TRULY SMART BUILDING

- **Up to 100 emergency lighting units** can exchange data on one gateway
- **Scalable Zigbee mesh network** makes adding fixtures easy
- **Exitronix** products can help you address requirements in **LEED® building certification**, and help you to capitalize on government rebates

# ZIGBEE MESH NETWORK 10
